B.N.P. - SHIT YOURSELVES!

THE BRITISH NATIONAL PARTY must've thought they were pretty lucky getting Derek 'Alf Garnett' Beackon elected in Millwall last 16th September. The NF got two councillors elected back in the 1970s but the NF's now so feeble C18 can beat up its fuhrer, Ian Anderson, and so bent Anderson can rip off party funds to pay his mortgage with the full approval of the rest of his executive!

The BNP know now a single councillor means fuck all except publicity. It bought in a couple of hundred members – but also got the anti-fascist's act together.

As Beackon walked into office, council workers walked out. Not known as a genius, he then made prattish comments about deportation that could disbar him and he's now in hiding.

The BNP Brick Lane papersale was driven off after anti-fascists rallied

We still need the Big One. Greenwich Council are still being total tossers about shutting the BNP Bunker despite its clear dual use and major demos, two ending in riots.

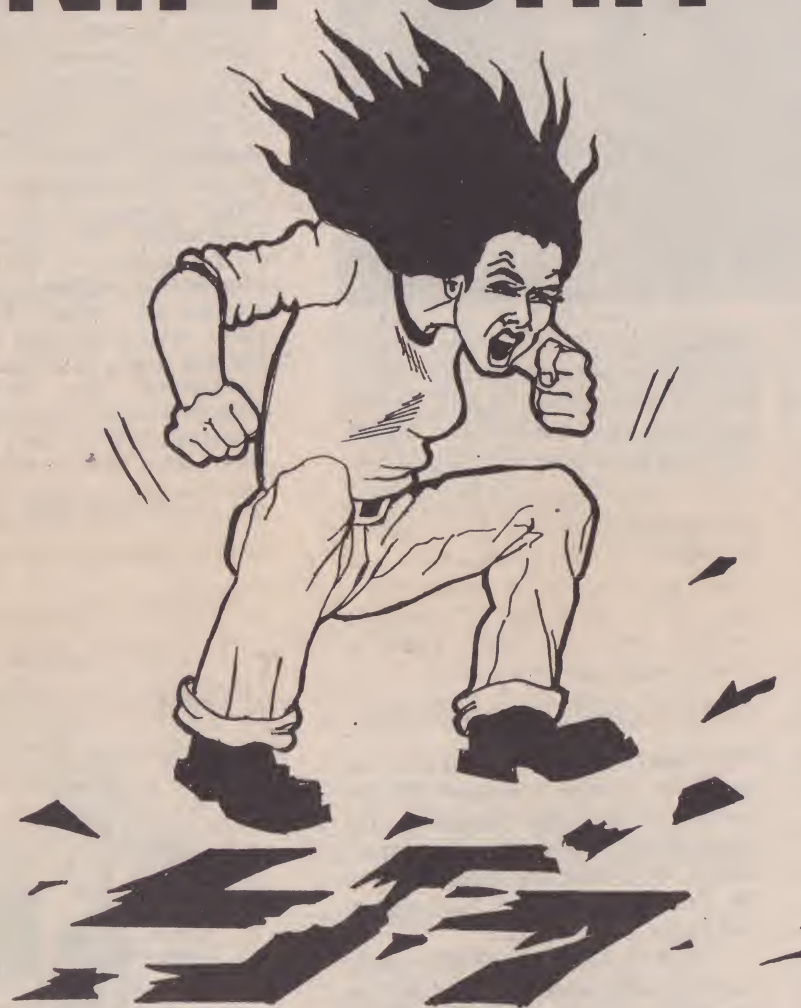

On the events of 16th October, we'll draw a veil over the ARA v. ANL bickering - careerist bullshit the Lawrences were right to wash their hands of.

We also don't really give a damn whether 25,000 (cops) or 45,000 (ANL) turned out for it, *if* all they were going to do was *march*. We see no reason to dispute claims that the Met sealed off all routes of march when it arrived at Upper Wickham Lane and therefore started trouble – except to say it was better people arrived ready for trouble than the cops pushing it on them. They were well tooled up for it and were into beating on people, *punishing* them for turning up, rather than nicking them with the fucking Sarge the Scum

COLNE

ON APRIL 16th, AFA descended upon Colne, described by the BNP as the "last White town in Lancashire" (though the large crew of Asian youth who turned out obviously didn't realise this). Having convinced themselves of their own popularity the BNP stood a candidate in a council by-election, choosing racist jailbird Shaun Cranble to carry the flag.

The fascist's plans for an election rally on the 16th came badly a cropper when AFA were told the location of the venue by disgruntled locals and took up residence in and around Ball Grove Community Centre in advance of the fash. The BNP's triumphal entry into Ball Grove involved about 40 patriotic losers skulking in a corner of the park greeted by an 80 strong AFA with cries of "sieg heil" for the benefit of the police who thought we were the BNP despite the presence of Black and Asian activists! Unfortunately the fascists knew who we were and retreated as we charged at them, being saved by riot police and dog handlers.

With the fascists cringing behind police lines, our attention turned to a carload of latecomers behind AFA lines. They were immediately set upon by about 25 anti-fascists who trashed their car and rearranged their faces while their aryan brothers looked on. Three anti-fascists were arrested and now face serious public order charges.

All donations to the arrested activists bust fund should be sent to:-

Manchester AFA, PO Box 83,

BURNLEY

ANTI-FASCIST ACTION again had reason to visit the town of Burnley on 25th September in response to BNP activity. They were standing two candidates in local elections, one of whom was gormless twat Scott O'Sullivan.

The ANL had arrived before us and gone round accusing everyone they didn't like the look of of being nazis (including two Black fans I talked to!), which hadn't endeared locals to the anti-fascist presence. The fash from Burnley had also whipped up many fans into a frenzy over 'reds' coming to Burnley looking for a scrap.

about deportation that could disbar him and he's now in hiding.

The BNP Brick Lane papersale was driven off after anti-fascists rallied there three weekends in a row, C18 lost face to a sly kicking from Youth against Racism in Europe, the local Asian community organised itself and the cops kept far-Right East End support out the second weekend.

Richard Edmonds, deputy BNP fuhrer, also got himself banged up for some dumb glassing incident, leaving his missus all alone at the Welling bunker. There's a lifelong GA sub due whoever tells us where he's remanded...

This made the day a fiasco, alternating between being penned in and confronting Burnley fans while the BNP, including Ken Henderson and Richard Edmonds, never came into town at all. These shitheads and sixty of their genetically impaired followers were escorted around the nearby town of Bacup by the cops who allowed them to leaflet a council estate!

With hindsight, things don't look too bad. The BNP got so few votes that they've abandoned Burnley altogether, AFA recieved an OK write-up in the local press, Burnley Trades Council have stated they'll financially support AFA activists arrested on the day and local Asian youth are talking about forming an AFA group. So all's well that ends well.

CRASH!!!

WE WERE SO PLEASED to hear of the death of Screwdriver 'singer' and Blood & Honour leader Ian Stuart Donaldson, we pissed ourselves laughing.

Donaldson's showdown came on the 25th September when his car came off worst in a pile up leaving the Aryan superman mangled beyond recognition. Ha, Ha, Ha!!!

A hard core set about daily disruption from Camelot Camp at Olivers Battery, at the south side of the Itchen Valley, but the toll of arrestees mounted. Most of these actions were 'Group 4-dodging to lock on the Cat'-type stuff, but some were different -- the occupation of local contractors offices, including Tarmac's at Chandlers Ford on 19th March thast got their file store flooded, computers wiped and 30 of us arrested.

Most turned out for irregular weekend Days of Action which got stroprier as days went on. By April 17th, the Cats were being covertly wrenched after we'd locked onto them, one being put out for a fortnight after its hydraulics were fractured. That day there was also a fuss about four Group 4 guys being done over -- BS, unfortunately.

ECOGASMICIDE

GROUP 4 own 50% of Ecover shares [Source: Radio 4], profitting from gormless green consumers whilst at the same time raking in a tidy profit from ecocide at Twyford Down. So much for capitalist investment in socially useful projects! It just goes to show that there is no such thing as an ecologically/socially sound investment. Will wealthy greens of Jonathan Porritt's ilk now put their dirty money where their mouths are and buy up land for non-profit making organic community ventures? Dogs bollocks they will.

DUTCH TRASH MUTANTS!

FOLLOWING THE 1986 bombing of the Biotechnical Research Company by Rote Zora and the attack on strawberries sprayed with a genetically-engineered bacteria, Frostban, by Mindless Thugs Against Genetic Engineering in California the year after, this new trend in technocratic resistance has spread to the Netherlands.

The Razende Rooiers ('Raging Diggers') trashed a field of genetically-engineered corn near Rilland, owned by the Suikerunie Corporation, and mutant potatoes in Wageningen and Bant, the property of Plant Genetic Systems. The attacks put these 'Dr Frankenstein' researches back over a year and cost them £10,000s.

Attacked for Luddism, the Razende Rooiers responded that by patenting 93% of food plants and undermining global biodiversity, the technocrats are going to have all of us under their thumb.

If some were absurd ('Reed Warbler', 'Miss Raspberry' etc), that didn't stop the DoT applying for an injunction to stop activists trespassing and trashing their works. A High Court judge, Justice Alliot, not only granted the injunction (absurdities and all) but made all on it "jointly and severally liable" for damages.

The injunction was obvious bollocks and Alliot a pawn of the road lobby so on the 4th July Twyford Requim demo, around 20 of the 55 injunteees joined a mass trespass the length of the Tory Canyon through the Down. One immediate effect of this defiance was the scrapping of the planned road through Oxleas Wood [see GA31], worth a hundred times that through the Down to the DoT!

THE STRUGGLE CONTINUES

With most key activists barred from the Down, the struggle broadened. On the Twyford front, Wolverhampton EF! repeatedly led activists through Tarmac's national HQ, disrupting their AGM on 15th June and siezing files ALIU-style on 23rd August as "Earth police".

After their release, Pail Pritchard and Bob Baehr headed north to join the Flowerpot Tribe's struggle against Newcastle City Council's destruction of Jesmond Dene, urban greenspace, for a crap road allegedly to save "30 seconds" through the town! As at Twyford, injunctions were dished out and private security were called in, but as the result of a hell of a lot of tree-sitting and spiking and occupations of plant and concrete casts in August, the Council have been forced to "consider" their scheme.

NORTHUMBRIA WATER HIT...

FOR THE SECOND TIME in two years, Northumbria Water's portion of the planned national water grid was attacked by ELF activists. In

This all peaked with the Battle of the Bailey Bridge on 22nd-23rd May — the DoT had to get a bridge in place on the one day the A33 was closed. Against this Operation Market Garden, EF!ers came up with Operation Greenfly, barrelling through razor wire and cops and Group 4 that outnumbered them three-to-one to stop the bridge being moved. The lock-on was

eventually broken early in the morning with the persuasive talents of the riot cops. However, whilst the cops were busy with the bridge, ELFers were busy with the plant, lighting a bonfire under the arse of one Cat for £300,000 damage!

The DoT's Oxleas flop set the stage for the other big struggle at the moment — the M11 was supposed to be the north end of the East London River Crossing. EARTH TREK-RAFFION FRONT

NORTHUMBRIA WATER HIT...

FOR THE SECOND TIME in two years, Northumbria Water's portion of the planned national water grid was attacked by ELF activists. In mid-December, survey stakes and sighting boards for the Kielder Water pipeline were trashed. ELF are angry that local water is to be stolen for use in London.

AND St JOHNS

A YEAR AFTER St Johns College became the first British victim of tree spiking [see GA30], they were attacked again by the ELF last Earth Night, 5th November.

St Johns was planning to rake in £20 million by building a luxury housing/marina complex in Oxford that threatened a wetland wild-life area, the Trapgrounds.

ELF retaliated by briefing local residents on eco-defence tactics with anonymous leaflets. This tactic stopped the Church of England's £1 million development at Glebe Field, Oxford, in 1989. The cops are taking the leaflets "very seriously" and St Johns are "considering their position"....

MANN ON THE RUNN

AFTER BEING SHUNTED from one cop shop to another since October 1991, ALFer Keith Mann liberated himself from the back of the cop van in the yard of Stretford police station last June.

Another kick in the balls for Greater Manchester Constabulary, who also blew the Operation Fox trial [see GA29] when the jury decided it was OK to conspire to torch an illegal slaughterhouse.

NORTHAMPTON TWO FRAMED

RICHARD DURIEZ AND Annette Tibbles were sent down for four years each last 4th June for conspiring to arson meat trucks. They were the only animal lib activists to be convicted in 1993.

Richard and Annette have been framed. The cops admitted messing with

evidence in court and we *know* the two didn't do the trucks, as claimed in court.

FESTIES

IT'S BEEN A BUSIER Summer for us at the AVA that last year, what with stalls at Kingston Green Fair where RDF proved they were back to form, though slimmed down in number and the most punked up and lovely reggae/ska sound since Linda left.

Then on to Glastonbury and the usual harrament from the security getting in, even though we had a ticket this year. After a slow start due to the blistering sun and heat, things moved very well and the mag went so well that we ran out. On the music front, Leatherface were on top form but on the whole the music wasn't as good as last year. Even though Glastonbury was more soulless and the cops more racist (strange they only picked up Black dealers...), we still found ways to amuse ourselves.

Deptford Urban Free Festival was a shock when we discovered it really was in a park behind the Venue. How they managed to get everything in amazes us but they did and with seven stages with the likes of Blade, The Sea, Fundamental, Senser, Back To The Planet, Rhythmites, Test Dept, Orbital, the Proles, Tofu Love Frogs and more, there was something for everyone. They even had a funfair. It was the best of the events we had a stall at, with the best of the music and best of all, it was free to get in.

For those who were going to Torpedo Town Free Festival or for those who went and found nothing there, the reason is that the organiser was arrested and we hear that bands intending to play were threatened with immediate arrest and confiscation of instruments. We hear the ailing Surrey Union occasionally gets local BNP thugs to 'protect it from sabs', but know Margaret Flynn has *broken* with her Hollywood Nazi husband, Terry, and his laughable national socialist big boys club, the November 9th Society.

Beagle hounds lost in Animal Front raid

THE CHESHIRE Beagle Hunt have offered a reward of £5000 for information leading to the recovery of Beagle hounds stolen from their kennels last week.

The Animal Liberation Front claimed responsibility after the break-in near Cholmondeley last Tuesday morning and said the hounds were now being looked after in

individual kennels.

A Hunt spokesman said: "These criminals obviously don't know or do not care that our Beagles are social animals which will suffer in a lonely environment."

The ALF Press Officer Robin Webb said: "They will be domestic animals and are already in their permanent homes."

"It will be beneficial for the dogs and will be far better for them than being starved the day before a hunt."

He warned that the Cheshire Beagles could expect further attacks from the ALF.

He added: "As long as the Cheshire Beagles are in existence they will be one of our major targets."

STONEHENGE

ARTHUR PENDRAGON [see GA26] is suing Wiltshire Constabulary for two 'arrests' under s.13 of the Public Order Act.

He proved that procession orders can't be used to stop individuals walking through an exclusion zone this summer solstice. The 4th July Twyford Rising demo also knocked the injunctions previously used to justify tie exclusion zone on the head too.

Result: English Heritage agreed access to the Stones this Winter Solstice - go for it!

BIG BROTHER?

A COMBINED POLICE intelligence operation now has files on and aims to monitor every movement of 8,000 New Age travellers in southern England. In Operation Snapshot in March, 27 police forces came together to set up a database on every vehicle thought to be staying on a travellers site. It has already logged 2,000 on 300 sites, noting details of each vehicle like registration numbers and descriptions, equipment carried, who owned it and so on. The database also stores information on 300 travellers who have "attracted the attention of the police". Few of these people have convictions - their 'crime' is to live on the road. So if you get pulled in the South and they already know your name, now you know how they've got you on file. Welcome to 1984 - Big Brother IS watching you.

CONFUSED? YOU WON'T BE

A simplified summary of GA's expose, *A Lie Too Far: Hepple, Searchlight The Left*, for those of you that found our original booklet too complicated

THIS IS A STORY of infiltration (spying), disinformation (lying), and double dealing. We'll introduce the characters as we go along.

Tim Hepple started his association with Green Anarchist early in 1991. Before this he had been involved with the Quakers, anti-poll tax movement and anti-Gulf War campaign in Lancaster. He attended the Green Party conference in Bridlington and the Wolverhampton conference later that year.

He never hid his fascist 'past' and was an enthusiastic if some-

Larry O'Hara soon put us wise to Tim Hepple's infiltration of GA, and the role of Searchlight as a mechanism for the State to keep tabs on the Left.

Suddenly, a lot of Tim Hepple's behaviour fell into place. Our suspicions about his intelligence background, his list kleptomania, his role in winding things up, and all those sudden changes of political direction - all of this was explained.

Instead of going right ahead and publishing the lists Tim Hepple had so very conveniently given us under our own name, as he urged us to do, we passed them on to other people, including Larry O'Hara, for verification.

We quickly found out that the information about Combat 18 was wrong, deliberate disinformation. Like all disinformation, it wasn't all bullshit. Some of the names were correct and even a few of the addresses. Thus, it was potentially plausible, especially on the surface. Hepple was being used by Searchlight to feed disinformation into the anarchist movement.

As well as trying to pass the list off on GA, Hepple claimed that while he was infiltrating the BNP

searchlight, then, was it just 'a lucky guess' by Hepple - or collusion between Searchlight and the far Right?

Then ask yourselves how come Searchlight has never made any public mention of Target 2 or that Tim Scargill was at the head of its hit list? If Scargill is a 'fellow traveller' with C18, how come they've attacked his Redhill home with such frequency and ferocity that he's had to move out?

Then remember Hepple's boast that he'd "dropped Scargill right in it". Think about it.

OK, we've nearly finished the story.

On Monday, 19th April 1993, Tim Hepple appeared on World In Action talking about his role as a spy on the fascists. He also admitted taking part in an attack on SWP members.

With the publication of At War With Society and its serialisation in New Stateman & Society, some more of his activity as a spy in the far Right has been revealed, though it's obvious that whatever claims are made there will have been edited by Searchlight. The hand of its editor, Gerry Gable, is embarrassingly obvious in what is presented as Hepple's own words as well as Gable's 'explanatory notes'. My view about people Larry O'Hara, Tim Scargill etc have radically altered. It is quite clear that they are victims of a vicious smear campaign. I am not holding Scargill's alleged past against him: if I did I'd be condemning myself after all!! My view NOW is that we should meet Scargill & O'Hara face to face & ask them straight out what is the truth behind what I know.

At the time it looked fair enough. Looking back we see how Hepple and Hill reinforced each other's credibility on initially making contact with GA.

Understandable so far, isn't it? OK. Tim Hepple made contact with GA in Oxford during August 1991 claiming he wanted to set up a north west anarchist network. He asked to see GA's address list. The point about this is that GA is not an open organization, and quite a lot of nasty people would like to know the names of people who are crazy enough to subscribe to such an extreme publication.

Some time after this, using his banner unfurling stunt at the Wolverhampton Green Party conference as a springboard, Tim Hepple also became involved with the setting up of Green Revolution, and was trying to get hold of the address list belonging to

Searchlight. Shortly afterwards, he decided to change direction and infiltrate the BNP in London on behalf of Searchlight.

In January 1992, BNP and White Power stickers started appearing on lamp posts in Lancaster and the publicity from this no doubt helped him gain entry into the BNP shop in Welling.

Shortly after the 1992 General Election, Tim Hepple disappeared from London and eventually resurfaced in Lancaster in August, claiming to have broken with Searchlight. He continued to hang around in the GA orbit.

It publishes lists of anti-fascists; names, addresses and telephone numbers of Left wing activists in Redwatch. Target, an associated magazine produced by Pro-Fascist Action publishes the same sort of information.

Some of this information was then used to target individuals, and Combat 18 also carried out attacks on the Morning Star and Freedom Press.

Once knowledge of the existence of these lists spread through into the Left, Tim Hepple appeared with the obvious answer - a Left-produced list of fascists. After all, who would be better placed to do this than the mole who had worked in the BNP bookshop just a few months before? So Tim Hepple passed a list of fascists to Green Anarchist, together with some interesting information about just who was responsible for Redwatch and Target.

Unknown to Tim Hepple, the editors of Green Anarchist had been contacted by Larry O'Hara, the independant anti-fascist

shop in Welling he heard from fascist sources that Tim Scargill, who was then in the process of splitting from the Class War Federation, was a 'turncoat' supplying C18 information on the Left for their hit lists via Croydon BNP.

A month or so after Hepple tried to put this story about in anarchist circles via GA, Scargill published a list of fascist names identical to the one Hepple had given to us, together with the disinformation about Combat 18, in a Class War Organisation internal bulletin called Network News.

Hepple had boasted that he's "dropped Scargill right in it". We were to find out why, and something of the slimey way in which Searchlight operates, when the April 1993 and subsequent issues of Searchlight attacked Scargill for circulating the very list which Hepple, a Searchlight pawn, had planted in the anarchist movement.

The story doesn't end there. The Targetters Targetted list started out by saying "The BNP have published the membership lists of Class War and Red Action in a magazine called Target". Hepple tried to pass the list off on GA before November 1992 and stuff about CW and Red Action only appeared in the second issue of Target, published in February 1993. How come Hepple knew what was in Target 2 a good three months before its publication? Ask your-

notes and chronologies he'd bunged Searchlight to ghost-write into 'coherent' form for publication.

The attacks on Tim Scargill, Larry O'Hara and, after the publication of A Lie Too Far, on Green Anarchist itself in the pages of Searchlight only serve to confirm our view of what has happened.

If the facts and interpretations in A Lie Too Far are incorrect - and they include the reproduction of a letter to GA's editor by Hepple in his own handwriting that "Tim Scargill, Larry O'Hara and co ... are the victims of a vicious smear campaign" - detailed exposition would expose this. In fact the opposite seems to be the case, with Gable himself conceding in At War With Society that Hepple was responsible for the lists being passed to Scargill! Frenzied personal attacks on A Lie Too Far's authors and publishers are beside the point. Is it true or isn't it?

If somebody like Tim Hepple can infiltrate the far Right, pretending to be a fascist and walking off with their address list, is it so far-fetched to believe that the same person could do the same thing to the Left?

If this is true, then what does that make his employer?

SEARCHLIGHT IS NOTHING MORE THAN A 'LISTENING POST' ON THE LEFT AND A CHANNEL FOR DISINFORMATION.

A LIE TOO FAR REVISITED....

An exclusive edited preview of *At War With The Truth*, Larry O'Hara devastating riposte to *Searchlight's At War With Society*

SEARCHLIGHT HAVE either ignored, admitted or lied/squirmed concerning the specific contentions in ALTF [ie. A Lie Too Far].

(1) Hepple as a self-confessed military intelligence asset (ALTF, p. 11)

-- partly admitted, though Hepple may well be lying about the duration of his service (AWWS, p. 17)

(2) Hepple infiltrating the Left as well as the Right (ALTF, pp. 11-18)

-- there is no attempt to refer to, and thus refute, allegations concerning his attempted theft of an anti-poll tax activists list or gaining access to the GA subscribers list and not pointing out fascists.

-- incredibly, we are expected to believe that "hepple had not told Searchlight about his other activities" (p. 18)! This from their 'star asset' who, according to Gable [ie. Searchlight's editor], was at one time engaged in "weekly and some-times twice weekly meetings" (p. 34).

-- as if that's not proof enough, Ray Hill penned, under his own name, an article for GA, Creating A Community, that first alerted me to malign interest of Searchlight/MI5 in GA! After being ostensibly introduced into GA's orbit by Hepple, Hill and therefore Searchlight cannot deny full knowledge of his activities - and the attempt to damage relations

existence or that it targeted Scargill (ALTF, pp. 25-6)

-- the only public reference to Target 2 is in a 17/3/93 Reigate Independant story - not written by a Searchlight asset (ALTF, p. 32)

-- thus, this disturbing possibility of Searchlight collusion with fascists in some aspects of targeting (especially anarchists) is still unrefuted - very interesting.

(6) that Searchlight allegations that Tim Scargill is a Nazi collaborator are fiction (ALTF, pp. 29-32/46-49)

-- April 1993's Searchlight stated he "dodged facing" AFA members (p. 14). Now AWWS lamely states he had been "playing political foot-sie with anti-fascist activists" (p. 26)

-- In AWWS, Hepple writes (p. 27):

"The story from Croydon BNP, related to me on three separate occasions by Ballard, Woods and Merritt respectively, is that Scargill meets them regularly and that they are in close contact still, after all these years. I once mentioned Class War at the BNP shop during a visit from Merritt to pick up some propaganda material. "Yeah, we know all about that, we know Tim Scargill, you know, he's really into this working class stuff".

Hepple is supposed to be a credible witness but Merritt's quote hardly implies Scargill is a

A couple more depth-charges have been tossed into the AWWS swamp. For ease of reference, I'll continue the numbering started above. Remember these are AWWS claims, not ALTF's.

(8) That I shopped Hepple to the far Right and blew his cover

-- This is the unmistakeable meaning of Gable's assertion that "it was only after O'Hara revealed in his booklet in Spring 1993 that he had seen Hepple's letter to the

-- A baseless lie - should anyone (from Left field!) care to pay costs, I'll be happy to take legal action.

-- There is evidence for incessant lies in Searchlight and now AWWS connecting me spuriously with Nazis, the IRA &c to incite violence against me. I predict Gable's next step will be printing my home address, something I have never done to Searchlight assets despite the utmost provocation.

According to Alan Milnes, writing in the first post-Hepple White Resistance (issue 7, May 1993, p. 2) "when late last year he presented me with leaflets supposedly printed by the Anti-Nazi League at Lancaster University denouncing Hepple and calling for his lectures to be picketed, suspicions were turned to certainties: the leaflets were badly forged on a simple word processor! -- Having failed to entrap them earlier, Gable now describes ALTF, which they co-produced, as an item emanating from "nazi counter-intelligence" (p. 18)

-- The idea that Searchlight is "run by Zionists" is attributed to green anarchists (and nazis). But as Tony Greenstein remarked in his 16/7/93 letter to Gable "I have always found it difficult to oppose racism or fascism in Britain and then turn a blind eye to racism and fascism directed against Palestinians simply because the perpetrators are Jewish. You have no such qualms" (p. 2). Saying Searchlight is Zionist is nothing to do with Nazi 'code' for 'world conspiracy' - it's the correct designation for a supporter of the state of Israel.

-- Readers will be intrigued to hear GA is a "hunting ground for fascists and nazis" (p. 34), especially when they split from former editor Richard Hunt in early 1992 because of his support for militarism and patriarchy. Perhaps Search

Steve Sergeant, younger brother of Charlie, someone running C18 according to Searchlight! All this contradicts Searchlight's fiction that I learnt of Hepple via his letters to Green Anarchist, items I only saw for the first time in March 1993.

-- As to how the far Right finally tumbled Hepple, well, he must thank himself for that. According to Alan Milnes, writing in the first post-Hepple White Resistance (issue 7, May 1993, p. 2) "when late last year he presented me with leaflets supposedly printed by the Anti-Nazi League at Lancaster University denouncing Hepple and calling for his lectures to be picketed, suspicions were turned to certainties: the leaflets were badly forged on a simple word processor! From that point on, contact with Hepple was severed".

(9) That I threatened Hepple/his family after the WIA programme (AWWS, p. 34)

(10) The disgraceful slurs against the Green Anarchist collective (AWWS, pp. 18/34)

-- Having failed to entrap them earlier, Gable now describes ALTF, which they co-produced, as an item emanating from "nazi counter-intelligence" (p. 18)

-- The idea that Searchlight is "run by Zionists" is attributed to green anarchists (and nazis). But as Tony Greenstein remarked in his 16/7/93 letter to Gable "I have always found it difficult to oppose racism or fascism in Britain and then turn a blind eye to racism and fascism directed against Palestinians simply because the perpetrators are Jewish. You have no such qualms" (p. 2). Saying Searchlight is **Zionist** is nothing to do with Nazi 'code' for 'world conspiracy' - it's the correct designation for a supporter of the state of Israel.

-- Readers will be intrigued to hear GA is a "hunting ground for fascists and nazis" (p. 34), especially when they split from former editor Richard Hunt in early 1992 because of his support for militarism and patriarchy. Perhaps Searchlight were merely referring to GA allowing Hill and Hepple to write for them?

REVOLUTION ON THE PERIPHERY

GA's editor outlines general strategy

THESE BASTARDS ARE LOSERS AND WE WILL NOT ALLOW THEM TO AFFECT OUR WAY OF LIFE..

HERES YOUR HARD HAT..

ITS BUSINESS AS USUAL SO COLLECT YOUR ID CARD BEFORE YOU GO TO WORK

STRATEGY AND TACTICS are terms of war and the enemy is civilization, the system that puts one above another and gives those on top the power to objectify and exploit everyone else. Time's running out for this shit system, but we've got to destroy it before it destroys everyone else with it. It's not a question of when do we fight but how.

We'll take 'by any means necessary' as a start, but why make things hard on yourself? Civilisation's about concentration, all the wealth and power in the hands of a few. You can wait around forever until you're strong enough to tackle them head-on, but that's not the green anarchist way.

We argue for the revolution on the periphery, and that's pretty much anywhere the hierarchs power is weak, not strong. Hit 'em where they're weak and you can win now or in the near future. Hit them enough times like that and in the end they'll dwindle away to nothing. Maoists call this 'the war of a thousand fleas'.

When we say "hit 'em", I mean anyhow - physically, economically, ideologically, culturally, you name it. Armed struggle alone won't smash civilization - transferring a monopoly of arms from one elite

the lowest respect in/for so-called civilization.

We're near civilization's core here in UK, the belly of the beast, so we should start looking at 'the strategy of the soluble'. Do what you want openly when the State allows it, call it something else or do it secretly if the State doesn't, and attack it at its weakest only if that doesn't work. We'll be amazed what you can get away with.

In terms of 'nuts and bolts', we're looking at cultural change - 'culture of resistance' - not one anti-civ milleau but many, all the different countercultures shat on by society, all with their own values and united only piecemeal as common oppressions arise. If it's fun, gives people the meaning and respect they don't get in 'rat race' society, others'll join in and it'll grow.

People can't eat fun, of course. Parallel economic activity is important - the green and black economy - tackle the loopholes and blindspots to make your living and tie it into the alternative network not State societies. Support each other economically as well as socially.

Is the State going to stand for this? No chance - it only holds

Biosphere 2 shows.

What we need is dual level organisation, an alternative underground, the 'fish' in the 'sea' of the culture of resistance. The pigs aren't welcome in the latter so there's no way they'll penetrate the former if there's even basic understanding of security. As to the offensive, people with no stake in the system can attack it without restraint - they're not cutting their own throats. Scattered, spontaneously acting cells can cause chaos if they know what they're doing. Due to division of labour, civilisation is a highly vulnerable, mutually-interdependant network bound together by infrastructural threads that anyone with the basic know how can cut.

However, I'd counsel restraint here as you never really know when the last push is needed. Always use the minimum necessary force to achieve your ends - so you can use your remaining energies elsewhere, don't provoke a back-lash and keep 'em guessing as to what you really are capable of in extremis. The latter should stay the State's hand until it's too late for it to strike. I'm not saying "be reactive" - I am saying your actions should be dictated by the broader, alternative agenda

Finally, words of warning. Tearing down the existing order is no good thing if you replace it. Bigger isn't better - never organise on principles of mass. If a group's getting too big for everyone to have their say, respect diversity and split it so everyone gets to do what they do best. If one group in a network is developing monopoly, get them to teach what they know to everyone else or share their sources.

Enough waffle: think about it, act on it!

SMASH THE RICH

Pal Pat suggests his radical alternatives to mass demonstration

OK yah. We want to bring down the government, like yah. Like let's join the protest demo yah. 'They' will have to listen to us OK? Right on! We want more money, rah rah rah! Look at me. Look at me. I'm demonstrating. No, no, look over here. Look at me. How can I gripe and complain properly without an attentive audience? It's not fair. It's not fair. What do we want? More money! When do we want it? Now. It's not fair, nah nah nah. Is anybody listening?

Closed circuit TV. Hidden microphones. Infra-red sensors. Motion detectors. Pressure sensors. Blacklists. Computers. The Economic League. Group 4. MI5. Fuck knows what else.

Of course the government and their cronies don't rely solely on hi-tech security equipment. They gauge your feelings from market research. Do you like politicians? Do you like red roses? What about bomb shells?

Fancy a breath of fresh air? - ECONOMIC SABOTAGE. Yep folks. The great way of kicking arse without making a complete prat of yourself. Screw the Labour Party. Bollocks to The Revolution. You like fur coats? Yes?! Wow! Up the price. Oops, the prices are already sky high. In fact the cost went through the roof when the ALF started damaging stock. Insurance premiums have made fur coats uneconomic.

Seen through the cruel hoax of 'private property', and how the

United Nations and the World Bank arm property owners? But don't know how to end Third World debt? - Donate your Red Nose money to the profits of superglue manufacturers, then glue up High Street bank door locks and cash dispensers. Don't just redistribute wealth - like boosting the income of car resprayers at the expense of Porsche owners - wreck the whole economy! Three cheers to anyone who comes up with the computer virus that makes banking uneconomic. And don't just stop there. Put the fear of death into rich scum.

Not convinced? You like no-brain, feel-good street demos? Well the culture of resistance is coming to get you. We are the people. You are just a duplicated

television image. What? You do have a brain? - You can think! Go kill a politician. Don't you just know it makes sense. One bullet stops one bigot spouting forth on millions of TV sets. The IRA haven't had much success with political assassinations. You can do better! The IRA always get the wrong politicians. Only libertarian intellectuals and nutters trust their own judgement enough to know at the first call that the Media Party contains the most dangerous

politicians - such as Steve Wright (In The Afternoon) and Trevor McDonald (Tens At Ten). Blow up their broadcast transmitters too, or better still (it's cheaper), use jammers in ad breaks. Commercial stations pretty soon go bust without advertising revenue. Capitalists can't shift their two-in-one shampoo and conditioner either.

'Stop the City' in the 1980s was a great example of subverting respectable street march demos for economic sabotage purposes.

But like, wow, the IRA have hit on a winner this time. Their City bombs. Need I say more?

A neat little way of outdoing the IRA's attempts at bankrupting 'Gerald Ratner's culture of crap' is to stink bomb the London Underground - or McDonalds or banks or supermarkets etc.

A few years ago the recipe for an extremely foul stench was circulated around London @'s and on June 21st parts of the Underground ground to a standstill due

to a "mysterious gas leak" according to the BBC.

As for surviving in the meantime while we help capitalism to collapse, you might do well to start growing food. Forget about city allotments - unless you've got an Uzi and lots of razor wire. Get out into the countryside. Plough up Prince Charles' favourite polo pitch at Kirtlington Park, Oxfordshire. But make sure Charles and his aristoprats are fertiliser first (dried blood and bonemeal).

doing and be waiting for you. Inject spontaneity, fun and laughter into it because unpredictability is important.

We need to see the importance of the media. TV is not our friend, yet how many movements fit themselves in with the oppressor's framework just for 30 seconds of off-peak air time? Don't compromise. Remember, TV is the politician's oxygen of publicity, the media is the system's life supports machine. Switch it off.

TV lies to us. "There is no

revolt". All revolutionaries are "outside agitators", aliens, vermin, devils from hell recruited by Margaret Flynn, locusts, mutants, etc. When revolt cannot be absorbed back into the spectacle, it must be ignored. Riots, explosions, mass disobedience, Disneyworld's own UN troops under fire - these can never be recuperated. Even better, the most powerful image of revolt will be the blank screen. If "reality" equals the world presented through their media, when you attack that media, you destroy their world.

TACTICS FOR A BETTER FUTURE

Gemima argues for women in the forefront of the Revolution

A GOOD LONG-TERM STRATEGY is one that can be performed largely by women.

Much as we may feel like throwing a bomb through the window of Number 10, it would probably be credited to the IRA anyway.

And who would sit with the kids while you did it? You couldn't leave them with your mother really, could you? Amusing thought, though.

They don't work because they don't bite. Complain all you like, but the pigs will take no notice. When you start hurting them, things will change. You take back the power, they lose the initiative.

The ALF has shown that economic sabotage works. Hit them where it hurts. We've got to get away from the NVDA masochist mentality. "Arrest me!" "Fill the jails!" - stuff that. No more NVDA, we want TVDA (Totally Violent Direct Action). The exploiter, destroyer, vivisectioner, earth rapist and oppressors are personally responsible for what they do, and need to pay for it personally...

All the successful movements show the way. We need to form small tribes, or cells. Three or four can achieve a lot. No command structure, no one giving orders, no organization structure which can be infiltrated and turned. No figureheads to become state hostages. This is anarchism and it works. This is what the pigs are really scared of.

One person alone will achieve something, but a tribe will do better. It's no good if you can't trust each other, but a tribe or cell of friends will grow in skill

and confidence when you carry out actions together. You can watch out for each other, complement each others' skills. It's more fun to act together.

Each tribe has got to be watertight, not be part of open groups or organizations. Openness kills. Publicity seekers get caught. Address lists, membership schemes are a bad idea. Everyone in the radical world has got to learn to keep their mouths shut. Revolution - any silence. Don't trust people who talk too much, or ask too many questions, or boast about

what they've done. Never take anything for granted.

Each tribe sets its own agenda, works to its own pace. Nothing need be excluded. Cheap and simple ideas are the best, like the candle fuse for firebombs. You decide what you can do, you can tell what you feel comfortable at. It is important that you develop your own agenda - don't work to one dictated by the State. You all should become activists, but stay activists.

Think long term. Where will you be in 10 years? Let's get away from limiting ourselves to the single issue, single approach, because all the areas of Disneyworld are connected. Hurt one area and you weaken the whole. When you work to a pattern they could see what you are

More effective is to use your influence as a mother to steer your children along the right lines. Have loads of good GA babies. If they must go to school (free childminding!), augment the bullshit with healthy doses of reality.

As a mother of young children, you can get access to loads of

impressionable young minds. In playgroups, nurseries, infant schools etc. Be alert, subvert crap opinions in embryo. Show children alternative ways of thought. Subverting as many children as possible away from the narrow-minded stupidity of their elders can only be positive. They, in turn, can influence their parents.

By opening children to reality, we can build a better future for everyone.

STRANGE GOODS

Our anonymous surrealist advocates an end to consumerism

ONCE THERE WAS THE ALF Mars Bar hoax. Then Lucozade. Now there are 'counterfeit' goods, pirate products made to look like established brands, fake Reebok trainers, or Coke tins not licenced by the Coca-Colonial Company. Earlier this year they had a scare when fake washing powder made of caustic soda went into the supermarket shelves, boxed like a well known brand but really mixed up by criminals in a disused Ashton Under Lyne warehouse, and packed into fire 'damaged' carton stock.

In Central Lancashire some blackmailers were caught attempting to threaten a butcher's chain with maggots in the meat. We have dangerous toys, caustic soda washing powder - the consumer nightmare is a place where the seemingly harmless is lethal.

I have a dream. When things on

the shelves are more and more the same, when Tesco, Sainsburys, Asda and Safeway have centralised, computerised distribution systems, when the human element is removed, the chance to introduce 'strange goods' becomes easier and more certain.

I have a dream. Dark juggernauts unload pallets of harmless yoghurt cartons at the Asda distribution depot. They look the same. The bar codes are the same. The vouchers and invoices are the same. By the next day a thousand hypermarkets are loading them onto the shelves. By the second day, in a million homes, people are opening their yoghurts. Suddenly SPLUHGE! luminous green gunk explodes across the kitchen-dinette covering the consumers, the pinewood breakfast bar and the peach kitchen units.

I have a dream. Strange goods

in all shapes and sizes everywhere. BMW gearboxes with some vital part made of chocolate. Rubber Snickers bars, Barbara Cartland books which are really Lady Chatterley, porno videos which are really Postman Pat. Newspapers which tell the truth, alarm clocks

which go backwards, remote controls which explode the TV, lamp posts that urinate on passing dogs. White bicycles everywhere.

I have a dream. Strange goods that make the consumer world so unpredictable that people stop consuming.

The terrorists have demanded millions of pounds from the firms, requesting the money be paid to organisations like the IRA's political wing Sinn Féin and direct action group, the Animal Liberation Front, as well as campaigning pressure groups such as Greenpeace.

The terrorists have pledged to carry out bombings, poison food and get hit-and-run drivers to mow down company bosses who refuse to shell out the cash.

Annette writes from Holloway about State surveillance

RICHARD AND I have just sat through our four week trial, and I hope to pass onto everyone some of the information we have come across. This is not intended to be a scare story, but to help us better understand the way the police treat Animal Rights.

If you asked a person on the street "what do you think the police spend their budgets on", most would say that the biggest expense was the IRA and murder cases. Few would guess that in some parts of the country the next area is Animal Rights! However there is a special unit working out of Scotland Yard, called the Animal Rights National Index (ARNI). If you asked a person on the street "what do you think the police spend their budgets on", most would say that the biggest expense was the IRA and murder cases. Few would guess that in some parts of the country the next area is Animal Rights! However there is a special unit working out of Scotland Yard, called the Animal Rights National Index (ARNI). Their task is to gather large amounts of information on individuals. When, during our trial, it became clear that they were doing a much better job of it than we had ever imagined, I decided to try and establish their sources of information and how they use it.

So far the police have indexes on people, addresses, vehicles and telephone numbers. It is quite shocking to find they have 21,000 names on the Index. Each person's sheet runs like this. Name, address, d.o.b., schooling, job, phone number, other numbers such as passport and bank accounts, aliases used, physical descriptions with updates if it changes i.e. haircuts, contact with police, sightings on demos or hunts, people standing next to the subject or travelling together, vehicles registered to subject and vehicles driven, associates and friends, memberships of organisations and past record of convictions.

Obviously, the more contact the police have had with you the larger the file. But the more active you are, for instance

sabbing, demos and friends involved in campaigning, the more likely is the chance of them having something on your file.

They use this information to build up an idea of who knows who and how strong their involvement is. So the areas we should be keenly aware of being careful about are address books and vehicles. Perhaps go through your address book and rewrite without using surnames and area (s.t.d.) codes. That will confuse them if they ever get their hands on it! Another area to be careful about is the type of literature you keep in your house. An SG Newsletter may be perfectly innocent in your house, but if the prosecution holds it up in court it takes on a completely different perspective. During our court case they used household items - plastic bottles, sellotape, candles - to try and say they could be used to make incendiary devices. It shows you how single minded they can be, not to see the innocence of these things. Be wary of new people asking stupid questions, and be aware that whenever you join an organisation the police know about it, from BUAV to ALFSG. Another area is telephones, houses and cars - treat them as bugged.

I sincerely hope that this helps people to build up a healthy paranoia. I am not intending to scaremonger people into stopping going to demos or any other activities, but I hope this gives us a better understanding of how intensely the police are acting out their Big Brother role. And I pass the message on to everyone - BE CAREFUL!

VIOLENCE?

A discussion paper from the Band Of Mercy

THE ISSUE OF VIOLENCE and the endangerment of human 'physical wellbeing' has recently returned to the debating tables of the animal liberation movement. This has come about because of the revival of the Animal Rights Militia (ARM).

The Spring 1993 issue of the Animal Liberation Front Supporters Group newsletter informs us of two recent ARM actions. Firstly, the now infamous Christmas contamination action taken against various Boots stores in the South of England; And secondly the planting of an "intricate explosive device" within Birmingham University in late February.

The reaction of the movement, so far, in general, has been one of open condemnation. Especially as the ARM's policy seems to have changed since its rebirth and they now, besides targeting individual animal abusers, are also targeting those who support animal abusers financially. One would assume that the logic behind such a policy change is that the animal abuse supporters are guilty of animal cruelty by association. In the same way a person who buys and wears a fur coat as guilty of association with those who killed the animals in the first place, a person who shops in Boots is guilty of association with those who vivisect at Boots. In both cases the associate is providing the financial means for the continuation of animal cruelty.

The justification behind the use

of ARM type tactics is that in the short term the endangerment of physical wellbeing obtains results. In 1986, in Australia, the 'Brisbane ARM' managed to have millions of pounds worth of meat destroyed after they claimed a major contamination action, against the meat industry. The contaminant in this action was claimed to be rat poison.

But as the Brisbane action showed (as other similar actions have shown) there was a public outcry with condemnation coming from all quarters. Yet despite this condemnation, these actions, that risk harm to human well being, continue. In America, in November 1988, Fran Trutt was arrested for carrying a remote control for detonating some explosives which had been placed next to a United States Surgical Corporation building. More explosives and two weapons were later found in Fran's New York apartment and she was sentenced for attempted murder. Many people, following Fran's sentence, thought that that would be an end to the issue of violence. Yet it wasn't.

In 1990, in England, two car bombs exploded under the vehicles of the vivisectionists Margaret Barker-ville and Patrick Headley. Neither of these vivisectionists were hurt, but in the Patrick Headley incident, a young child was injured by flying shrapnel. Again these actions received wide condemnation from both outside and within the movement. The hostile feelings

towards 'animal rights campaigners' at that time was so great that a number of local groups felt that they could no longer remain calling themselves 'animal rights' groups and changed their names to either animal concern, welfare or protection. Following the explosions anyone who admitted to believing in 'animal rights' was suddenly labelled a militant terrorist who went around trying to "blow up babies". An image that still hasn't truly left the animal liberation movement.

Now with the activists who advocate violence, no one can question their dedication to desiring the end to animal abuse. It is clear that anyone who is prepared to face so much condemnation must be totally committed to the animal liberation cause. However, we MUST question, in the long term, will violence achieve its wielders aims? Certainly the short term result is that of some spectacular economic sabotage. The image of a burned out car on the front of all the newspapers is most certainly a hard hitting picture. But what of the long term effects? To understand this we must examine the specific effects that certain actions will bring. To do this, we shall examine the consequences of three possible scenarios. There scenarios are;

- 1) The assassination of a vivisector.
- 2) the poisoning of goods derived from animal abuse.
- 3) The armed hijacking of a lorry.

The first scenario, of an assassination of a vivisector, seems to be a popular concept with those who support violence. Indeed upon the announcement that it wouldn't be until 1988 that a European ban of cosmetic animal testing would take place (and even that, thanks

would receive a bad name (again) and we would be able to recruit less members. Also, one would imagine, the climate of fear, within the vivisectors quarters, would soon turn into that of a siege mentality and make them even more resolute to torture and murder innocent animals. (Which of course would be nothing new). But the main long term effect, as we have already stated, would be a reduction in the gaining of new recruits (plus the fact activists, when caught, would be facing longer prison sentences which might even be used by the State as show trials).

The second scenario we shall discuss is that of the 'de facto' poisoning of goods. The contamination of goods, whose subsequent use could harm the physical well-being of the purchaser, would also receive wide spread condemnation. We could expect the usual hysterical reaction from the centralist groups who would claim, with some unfounded quote, that the movement has been set back a number of years. But despite that, the short term effect would be the destruction of thousands, even millions, of pounds worth of goods. However the long term effects could be even more harmful than the assassination of a vivisector.

With any poisoning campaign the organisers run three risks (besides the obvious one of being caught that is). The first risk is that their claim won't be taken seriously and the selling of contaminated goods takes place. The second risk is that some of the contaminated goods may be missed and they are subsequently sold. The third risk is that the police may deliberately under react (as they did with the IRA bomb threats before now) claiming that any warning was non-concise and deliberately misleading. Thus the authorities may well allow an

new recruits would be hard to find and an overall smaller movement would emerge.

The third and final scenario that this discussion paper shall be looking at is that of the possible results of performing an armed hijack. We can take it as read that there would be a wide spread condemnation of the action, but besides that, the short term effects would be the companies having their insurance policies go up and they would be forced into employing extra security guards to ensure the safe passage of their vehicles. Thus an armed hijack would appear to be a good form of economic sabotage (drivers may also cease to work for an animal abuse company, fearing for their physical well being). But in a prolonged campaign of this sort, the authorities would very quickly set up the use of decoy lorries containing armed marksmen/women. Already we have seen a situation where one member of the Whickham Four, at the time of their arrest, had a rifle placed to their head. And very recently, when an alleged ALF activist was arrested in Northern Ireland, the arrest was performed by eight

armed RUC officers. So it is not inconceivable that such strong arm tactics will be used again and surely it must.

But to the scenario. Once the decoy lorry had been intercepted by the hijackers the authorities would have no hesitation in shooting the activists DEAD! The SAS has already shot a number of suspected IRA members dead, in similar decoy manoeuvres, so we could expect the same thing to happen to animal liberation activists. If animal liberation activists were shot, there might be a public outcry with some opposition MPs calling for a public inquiry into the shooting (as has happened whenever the SAS have shot IRA members) but the overall result is the same; dedicated activists would be dead.

So, as this discussion paper has shown, the use of violence can, we feel, only lead to a recruitment problem; a smaller animal liberation movement; longer prison sentences; a Government clampdown on the animal liberation movement; And even the possibility of dead activists.

THE AUTHOR of the discussion paper above claims to speak for the Band of Mercy. If so, it's the 1990 version whose formation parodied the Lee/Goodman original by refusing the tactic of arson and whose claims of activity are so unsubstantiated that the ALF Supporters Group regard them with suspicion.

The author seems totally out of touch - after the last season, many sabs have already used violence in self-defence against hunt heavies as a matter of survival, not choice. We're talking well-obvious facts of life here, not ivory tower "scenarios".

What s/he writes of as future possibility is already present-day reality. Activists Mike Hill and Tom Whorby are dead, animal liberationists are already subject to intense surveillance from ARNI, media blackouts alternate with disinformation campaigns and then there's the mass round-ups, conspiracy busts, punitive sentencing and frame-ups. So does that mean there's no disincentive to animal liberationist violence now?

The State has resorted to these measures not because the ALF is violent but because it is effective. It's effective not because of "the image of a burnt out car on the front of all the newspapers" but

Violence is just "the illegitimate exercise of power" in my book and, of course, the powers-that-be determine what's legitimate. Any use of power in the interests of social transformation is 'violence' in the State's eyes, whether some exploiter gets smacked in the mouth, gets his windows put through - or not.

Time those calling themselves revolutionaries - and we assume the Band of Mercy do, despite the bullshit liberal language of the 'discussion paper' - stopped talking State language. That language is just another con, another stick it beats us with like all the rest of 'em listed above. State power is no more legitimate than y/ours - it's just another gang, one we aim to bust. We're not going to do that playing chorus to it, echoing its cries of "violence" everytime someone tans its arse. Why not criticise State 'violence' for once, challenging public acquiescence in its definitions, or fuck it off all together as it's our own actions that count?

The State has resorted to these measures not because the ALF is violent but because it is effective. It's effective not because of "the image of a burnt out car on the front of all the newspapers" but the reality of targets destroyed. Direct action is not an appeal to others but an end-in-itself. We don't need their intervention because we're sorting out what bugs us directly, ourselves. Unlike lobbyist groups, we believe we have that power - we don't surrender it to politicians. That way lies a future society free of them, one where we are self-determining individuals.

The discussion paper's been widely circulated to the animal lib press, the author presuming s/he can evade critical discussion because of the ALF's 'nonviolence' policy.

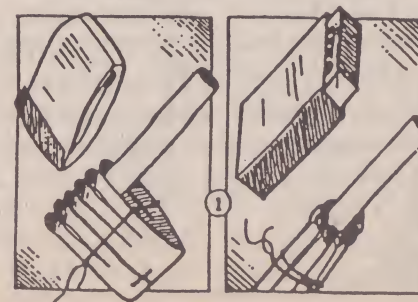

Against this, we say GA is not so constrained and add that ALF it-self should get real about non-violence if it's going to tackle a society in which animal exploitation is but one facet of heirarch-

and, of course, the powers-that-be determine what's legitimate. Power - that's just what it takes to make someone do what they don't want. The non/violence dichotomy is largely false, a bunch of crap that bores us shitless and which arm-chair revolutionaries toss around between each other instead of discussing - and practicing - what's most effective and the best security arrangements to deal with the State's proportionate and inevitable backlash.

1. TO SET A FIRE:

Protesters warn of 'spoiled' meat

FRESH meat was cleared off the shelves of a Cambridge superstore after a warning that it had been contaminated by animal rights activists.

Dozens of packets of fresh beef, pork and lamb were removed from the shelves of Leo's at the Beehive Centre.

Initial checks revealed no evidence of contamination.

A police inquiry has started into the circumstances surrounding the warning and Leo's is to run its own investigation into the incident.

Animal Liberation Front spokesman Robin Webb said he had

CAMBRIDGE EVENING NEWS - JUNE

received a warning from someone at about 10 am on Sunday who claimed to have contaminated food at the store on the front's behalf. He said he passed the warning to the police.

Contaminating food products was supported by the ALF, he said.

"It is certainly within the ALF's policies as long as the contamination is not life-threatening," he said.

"It is economic sabotage, to try to price them out of business."

Chris Cadman, a spokesman for Leo's, said the firm would work fully with the police to investigate the incident, and would give refunds to anyone who bought contaminated items.

will be issued with long prison sentences. In the aftermath of such an action, and egged along by the State run media, the public will be so hostile towards 'animal rights' and so convictions will be guaranteed, those less campaigners would be 'out on the street' and

some centralist groups would claim "the anti vivisection movement has been set back fifty years". This would of course not be true and would be highly self defeating, yet it always happens. But what of the long term effects? Well one could theorise that overall the movement

Say you bought the book from a place whilst on holiday and when you arrived home and started to read the book, your enjoyment was marred by the fact that pages 44-56 were missing. Say you would be grateful if they could send a photocopy in order to let you know the biological make-up of *Tricholoma bufonium*. Takes a bit of research in your local bookstore etc., but should get you a free book.

Almost all of the preceding scams rely on complaining and appealing to the scumbag companies desire to maintain good customer relations, so it's also worth remembering that by writing a letter or two occasionally to these companies saying how pleased you are with their products will often result in an occasional supply of free samples, new ranges and vouchers.

Write in and let us know how you get on (no specific details....!). If you know of any other dodges, please send them in. We're in this together, it's all Anarchy in Action.

I WANT YOU KIDS TO GET OUT THERE AND STEAL. SO HAVE A GOOD TIME AND... OH YEAH-DON'T GET CAUGHT!

CRIME-SHOPPERS TIP #27

IF YOU NOTICE SOMEONE SHOPLIFTING YOU CAN HELP THEM...

OH MY GOD! LOOK AT THAT HUGE RAT!

ISN'T THAT MICHAEL JACKSON OVER THERE?

...BY CREATING A DIVERSION.

SHOPLIFTING AND EMPLOYEE THEFT!

KNOW, AS MCTHIEF THE CRIME CAT I'M OFTEN ASKED TO SPEAK TO SCHOOL, CHURCH, AND COMMUNITY GROUPS. PEOPLE ALWAYS HAVE QUESTIONS ABOUT "HOW-TO?" AND "WHERE?", BUT MOSTLY THEY ASK ME "WHY?". WELL...

• MCTHIEF THE CRIME CAT

"SHOP-OWNERS TAKE EVERYBODY'S MONEY"

THAT'S \$12.37 SIR. WOULD YOU LIKE A BAG? HAVE A NICE DAY!

THE BUSINESS OF BUSINESS IS THEFT. every cent of PROFIT that businesses make is stolen! they're playin' ya for a chump - so wise up. when you buy, they steal your money. when you work it's even worse they steal your TIME, and then they give you a little bit of money, which someone else steals. Is dis a system? They've been robbing you blind all your life - now it's your turn to take a little bit back.

BUT DON'T SHOPLIFTERS MAKE PRICES HIGHER FOR EVERYONE ELSE?

SHOPLIFTERS DON'T CAUSE HIGH PRICES, BUSINESSES DO. BUSINESSES DON'T RAISE PRICES TO "COVER LOSSES" THEY DO IT TO PROTECT THEIR PROFITS.

ISN'T THAT KIND OF SIMPLISTIC? WHAT ABOUT NON-PROFIT BUSINESSES AND SMALL BUSINESSES THAT REALLY ARE LOSING MONEY?

POINT WELL TAKEN. IF A BUSINESS IS TRULY OWNED AND RUN BY THE PEOPLE WHO WORK THERE, AND THEY ARE ANTI-PROFIT, I SAY - DON'T RIP 'EM OFF! THEY'RE DOING WHAT THEY CAN. YA GOTTA USE YOUR OWN JUDGEMENT. UNFORTUNATELY, THE BUSINESSES THAT DESERVE TO BE RIPPED OFF THE MOST, THE BIG ONES, ARE ALSO THE HARDEST TO STEAL FROM. (WITH A FEW EXCEPTIONS, LIKE SUPER-MARKETS) BUT EVERY SYSTEM HAS IT'S WEAKNESSES, AND IF YOU ARE INTERESTED ENOUGH, YOU CAN FIGURE OUT HOW TO EXPLOIT THOSE WEAKNESSES FOR YOUR OWN ILL-GOTTEN GAIN!

...WELL, IT LOOKS LIKE WE'RE JUST ABOUT OUT OF TIME,

SO REMEMBER

IT'S YOURS, TAKE IT. PROPERTY IS THEFT.

A FEW TIPS:

BE A COMPARISON THIEF - DIFFERENT STORES HAVE DIFFERENT SECURITY SET-UPS. CHECK 'EM OUT. NETWORK - YOU'LL BE SURPRISED AT HOW MANY OF YOUR FRIENDS AND NEIGHBORS ARE ALREADY DOING IT. ROB YOUR BOSS - WHEN YOUR PALS WANT YOU TO SHOPLIFT, YOU CAN SAY "NO THANKS, I TOOK AT THE OFFICE DISCRIMINATE - THINK ABOUT WHO YOU ARE STEALING FROM - RIP OFF THOSE WHO DESERVE IT. IT'S ESTIMATED THAT \$16 BILLION IN MERCHANDISE IS STOLEN ANNUALLY. IF WE ALL PITCH IN WE CAN DOUBLE THAT. SO BE CAREFUL, AND ENJOY! SEE YA AROUND.

STORE BAG + NICKED GOODS = BIG MONEY!

1993 is going to be a boom and bust year. A boom for Shoplifters Anonymous and bust for big business.

WH Smiths is just one high street capitalist operation that is changing its rules on refunds and damaged goods. You can now go into any branch of WH Smiths in the country with goods sold in any of these outlets - WITHOUT A RECEIPT - and claim a voucher and, in some cases, a cash refund. You no longer need proof of purchase. Thank the complaining shoppers of Britain for this, comrades, because the constant stream of rude letters to WHS in Swindon (the company HQ) from disaffected customers who couldn't

get their money back for damaged or unwanted items has led to a major rethink. A rethink that plays into our hands as anarchists.

HOW TO STUFF SMITHS:

1. Nick a reasonably valuable item, using the usual precautions and diversionary tactics we know so well!!
2. As a cover, buy a cheap item like a pencil or rubber and make sure that the sales assistant gives you a carrier bag. Keep the item for a couple of days or more.
3. Travel to another nearby WH Smiths branch. Saunter up to the assistant with a smile on your face and say "I'm sorry to bother

you, but my girlfriend/aunt/Dad bought me this as a present, but I've already got one. Any chance of a refund?" They can't turn you down. That's official, from Smith's top bosses.

Other stores are operating similar policies. Ring them up and tell them that you have been bought two of the same item from their store for your birthday and could you get a refund? If you have a successful response, buy another cheap item, get that store's carrier bag, and off you go again!

Come on all you lifters, fuck the high street exploiters and claim your cash refund!

HI, ALL YOU SCAMMERS! This is the one they have nightmares about, the one they're redesigning the credit cards to stop - the one that pretty much anyone can do and brings in loadsamoney!

1. Find a mate that's well-credit-worthy and who's got an easy signature.

2. Do your recce - get your mate's signature down to a tee and take a day-trip round London to suss out exactly where you'll be

going.

3. When that's sorted, 'borrow' your mate's card and bus it to London. Buy stuff you can resell at the same sort of value you bought it (eg. booze, fags, tools etc). Be confident - don't buy too much at any one shop.

4. Your mate will report the card

Don't matter much which you do, except to have an address that is 'safe' if you change that address

or never had one (because you never lived in brick, born and bought up as a traveller, or are Irish: you will have to play the part to go with whatever explanation you give). Visit one of the big cemeteries in a large metropolitan area. Read the headstones of deaths around the time you were born. Cemeteries are usually filled up section by section so you won't have to read every one from 1848 to 1993. Try to find the graves of people who died in infancy (though old enough - more than six weeks - to have been issued a birth certificate). Note their date of death, names and ages at death if given.

Armed with this, take a visit to St Catherines House in central London. This is a public building, a bit like a library, so treat it as such. It is here that they keep a complete register of births, deaths and marriages for England, Scotland and Wales.

You can consult all documentation in the building (what a free country we live in!). Back track from dates of death of your chosen people (if you know what ages they were when they croaked, so much easier will this be). When you have found the entries, you simply fill out application forms for a copy of their birth certificates. The form asks you if you want a 'short' or 'full' certificate - I got the full one, the difference is it has a little more

info such as space for name of father if any and not a lot more. Cost when I got mine was £6 and £10 respectively for short or full. Also you have to put who you, the applicant, is. I just made up a name and signed it. You are also asked whether you want it posted or to come back three days later to pick it up in person. Don't matter much which you do, except to have an address that is 'safe' if you choose that option.

So far you have broken no laws. Local historians and family tree freaks order up certificates all day long and it's a good government money spinner. So no need to get worked up over it.

Armed with a copy of your certificate, you now ... sit on it. Dirty it up a bit and leave it for six months or so. After a suitable delay, choose a busy social security office such as Kilburn, for example, where there are a lot of Irish, a place where they are used to people applying for allocation of an NI (Irish people are entitled to NI for both Britain and Eire [1]). You then go in and ask for an application form for a National Insurance number. You will probably not get dealt with there and then but have your name and address taken and be given an appointment to return with your birth certificate. At the interview you will tell them you have lost it

or never had one (because you never lived in brick, born and bought up as a traveller, or are Irish: you will have to play the part to go with whatever explanation you give). NI is usually given out just before you leave school, so if you never went to school you maybe can't read and write much or that fast - geddit? As far as I can remember, you will have to pay **some more money** with your application, sign it and give an address for the card to be sent to - you do not get it there agnd then, nor in person. So again make it safe - it could be construed that you are now trying to obtain ID with intent to defraud. 6-8 weeks later, you'll get the card through the post, and away you go. Get a job (!), sign on, whatever [2].

If you wanna rip off a bank, apply for an account. You new need a passport [3] or birth certificate. You get fuck all to start with - a cheque book with no guarantee card and a cash point card to take out only what you have put in. So you've got to wait again; move some money in, take it out, back and forwards for six/nine months, until you look like a regular drone. **Then** apply for a cheque card and away you go again.

The ability to become someone else in a hurry is a process you

have to sort out now, before it becomes necessary. Because when the time comes to disappear it will be too late to go through this process.

FOOTNOTES

1. The Irish angle might be a good one - the IRA, bless 'em, blew up all the Northern Ireland records a decade or so ago.

2. The only way they can prove that you are not the person you have 'adopted' is to prove you are who you actually are. There was, at the time I done this, and I believe still the case, that there is no cross reference between births and deaths in any government department in this country. You'll only get caught out if you get stopped with two sets of ID or get visited at any address you give and have your legal ID there.

3. One year passports can be got with a letter to your address, a birth certificate and a bus pass. For ten year passports you need to send away your birth certificate and have photoes countersigned by a doctor, copper, teacher, some upstanding geek of the community. Probably to be avoided. Also to avoid is the medical profession as a whole, as your death is on a file somewhere along with your birth.

Send your letters to Oxford Green Anarchists, Box ZZ, 111 Magdalen Road, Oxford OX4 1RQ, but remember:-

* We print all letters recieved on a 'no censorship, no endorsement' basis. Your letters are your responsibility, not ours. We think readers are grown up enough to think for themselves, so won't usually comment on letters we print - even those we don't agree with - unless asked. The only exception to this are letters from fascists and other such bigots and pistakers. These will be binned, although we will note their arrival.

* We will ruthlessly edit all letters over 200 words long. So keep 'em short so everyone else can have their say too. Cut letters are marked with a [-] with the original number of words inside the bracket.

* If you don't want your letter, your name or your address printed, make sure we know.

STOP THIS WAR ON DRUGS [375]

Dear Friends,

We must co-ordinate mental health policies re. cannabis. Our social well-being depends on opening doors to the legitimate role of psycho-active plants in mind therapy. Many of our generation have been lost due to careless disregard of our right to self-determination.

Psychiatrists fob us off with horror stories of cannabis inducing ill behaviour. Is it any wonder that against such 'paranoid' fear of this drug, the medical profession can succeed in ever more powerful public health 'cleansing'?

While our seas are polluted by excess consumption, those choosing alternative life-styles face persecution because of 'illegal' cannabis use. Everything becomes a drug problem because psychiatry prescribes all social and spiritual crises to the drug addict. There is no room left for laughter, love and tears. It's all accusation built on a fear of 'substances' which affect judgement rather than the truth: it is only ourselves who determine what we are and how others perceive us.

Stop this war on drugs and let's regain our original Christian testament that loving thy neighbour is best regardless of which toothpaste s/he uses.

Dear GA.

As a primary school teacher, I get conscience attacks about how far I transmit the State's values by working in one of its institutions. I try to encourage individuals to develop to their full potential, to feel cared for & valued & to care for & value each other & other life forms.

This is subversive stuff considering how many daft, repressive laws the government has passed about education, clamping down with the national curriculum, prescribed booklists, league tables, tests etc. Whilst I worry about my effectiveness & my institution-happy moron colleagues, I'm reassured that the State hates the play-orientated, child-centred developmental education some of us encourage.

I'm convinced beating people is the wrong way to help them grow up. Robert thinks "fear" is a liberating experience cos you can identify your enemy. A neat model, but it really means people get damaged, & learn only to incorporate themselves into a heirarchical vision of relationships where exercising power over others becomes the crucial factor in their self-image & sense of well-being. People who abuse their children have usually suffered similar abuse themselves as children.

Turn all schools into Summerhills, not let the State drive us backwards to Dulleboys Halls.

Cheers, A N Teechur.

Dear GA,

It is surprising to see some people (ie George French) still adhering to the inaccurate, stereotypical and racist portrayals of 'Tribes'; he says "Tribes are the experts in ethical relativism, forest culture and the sustainable management of inter-tribal conflict". Sure they're 'Trendy, Funky and Ethnic'. but most Tribes in reality are anything but the Eco-friendly, egalitarian 'noble savages' of Mr French. Examples include the Amerindian tribes, who hunted many species to extinction, the Moari, who destroy -ed most of New Zealand's forest cover, whilst exterminating the Moas by over-hunting, the introduction of pests (rats) and the destruction of forest habitat. Most tribes, whilst not adhering to some ridiculous 'statist' policy, instead maintain power through differences in gender, age and initiatory affiliation. This is still heirarchical and not egalitarian. Georges' whole article, in fact, smacks of pseudo-scientific bullshit. What the fuck is "the theoretical and practical schisms must be clearly mapped out ... etc" supposed to mean? Whilst some people may gain value from having their non-dualistic post-modernistic schisms fully mapped out (sarcasm) I do

TRAVELLERS TOON: STONE REPLIES

Dear GA,

Fucking great! Somebody reads my cartoons. Somebody cares enough to complain! the cartoon isn't against travellers, but it is against pacifism. Eight years ago in GA6 there was a picture of the convoy trashed in the Beanfield. Cops are smashing buses while in front a man plays a flute. What have we learned since?

This year a Gloucestershire MP described travellers as 'New Age vermin'. Last year a cartoon in the Spectator had a roadside notice saying "Hippies 200 yards KICK your own". Then there are the comments against travellers in the Rightist papers. Major Frogmorton is gunning for travellers. They are shit scared because travellers reject their whole world

happy. Castlemorton colleagues, I'm reassured that the State hates the play-orientated, child-centred developmental education some of us encourage.

of values, and they know they can't be bribed. People with nothing to lose are dangerous.

You aren't going to change their prejudice, so take all their perjorative stereotypes and throw them straight back in their faces. So when Will Power throws his shit bucket on the ground symbolically he's overturning their whole value system, the cleanliness fetish and everything. He emphasizes the strength and solidarity of travellers - where even shit and piss become weapons.

Playing flutes won't work. Being peaceful and 'respectable' won't work. If they respected us they wouldn't treat us like shit. They trashed the convoy because they knew they could get away with it, but they won't next time. Police, forestry commission, government agencies and councils co-ordinate their actions with Hippywatch schemes. How many more travellers have to be killed? How many more beaten up? How many more homes trashed? Eat shit or fight back, the choice is yours.

SOLIDARITY WITH THE MINERS

Dear editor,

Its because I have solidarity with the miners that I campaign for the immediate closure and dismantlement of the coal industry. The blood, sweat and spiritual needs of the miners are sacrificed to the material form of life known as Carboniferous Capitalism. As wage slaves yoked to global recession, the working conditions will deteriorate to third world standards. 'Taught to labour' the miners and supporters praise the work ethic, muscular Christianity, private ownership of nature and wage labour as good things. In reality this mindset is the chain that shackles the affluent West to species extinction and the social evolution of barbarism.

In terms of raping the earth the mining industry is a world champion. The mining, transporting and consumption of coal sustains and legitimises the military industrial states assault on nature. How can we complain about 3rd world rain-forest destruction when we pour

SUBTLE AND CONSTRUCTIVE

Dear GA

We are playing into the hands of fascists and the secret state by adopting a policy of sabotage and destruction. If Green Anarchist concentrated their time and energies on constructive work like land co-ops and alternative communities, they would not present the same threat to the establishment, so would probably be left alone.

It has been said before in the journal that modern industrial society is on its last legs, its time to build an alternative instead of wasting time trying to knock over the last few bricks.

Getting hold of a sizable chunk of land seems to be the most important task. Forming a network of people interested would be a positive way forward: Bog roll sabotage, diesel engine destruction and cockroach warfare is kid's stuff. It led to FBI infiltration in the States and a subsequent car bombing. We should be more subtle and constructive than that.

Yours,

John Rogerson.

AN INSULT TO QUEERS

Dear Green Anarchist,

I've been reading your mag since I first identified as an anarchist and think it has better views and articles than other @ mags such as Freedom. But one article has really fucked me off. I'm glad you brought it to my attention about John Tyndall but please! Does it really matter that Martin Webster was a gay pedophile? I thought it was for his fascist views and actions that he's despised not his sexuality. You dodn't describe John Tyndall as that "heterosexual adult lover John Tyndall". What is Green Anarchists views on Queers and Dykes? Is it they're OK when there are political correctness points to be won but can be still used as an insult to get at Nazis. I don't doubt there are Queer Nazis but whether they can be attacked for their sexuality is doubtful. Also I felt the article smacked a little of prude-ism. So what if they're into bondage and rubber and knickers. So I am, so's my lover and some of my friends. I don't think we can fight fascists with secrets of their sexuality or bedroom fetishes. We need to fight it with the truth of [Ed - about?] their actions and their views. That should be enough. I'm Queer and an anarchist and I felt that you insulted me and feel I and other Queer anarchists are people who aren't anarchists or "normal" people. Your article seemed written by a heterosexual who has no idea about gays. Come on, Green Anarchist, get your act together, don't use us as an insult against fascists.

GREEN ANARCHIST QUESTIONNAIRE

Readers, we're interested in who you are, what you like about GA and what you don't!

We want *everyone* to fill in this questionnaire -- and that means *you!* Otherwise we'll just end up with the prejudices of the sort of middle-class twats that get off on filling such things in the whole time -- and *not yours*. If you want to add comments on a seperate piece of paper, all the better -- your opinions are much more important to us than a few ticks in boxes. We ask for basic information about yourself to give us a general idea who we're writing for -- but we *don't* want to know who you are, for the sake of your security and ours!

When you've filled in our questionnaire, send it in to us at **Oxford Green Anarchists, Box ZZ, 111 Magdalen Road, Oxford OX4 1RQ.**

FIGHTING FASCISM -- ROUND III

Dear GA/

Thought I'd better drop a line about the anti-fascist article in the last issue. Although I agreed with virtually all of its analysis and saw it as a nice change from the empty, pretty rhetorical articles on anti-fascism characteristic of other anarchist mags, I must take issue with the argument that the ANL are targetted simply because "they don't know how to take care of themselves". I do recognise that the ANL is an SWP front and that it is less directed towards combatting fascism than towards Leninist Party-building, but I'm afraid that this sounds far too much like a 'blaming the victim' scenario and could almost be read

FIGHTING FASCISM

-- ROUND III

Dear GA/

Thought I'd better drop a line about the anti-fascist article in the last issue. Although I agreed with virtually all of its analysis and saw it as a nice change from the empty, pretty rhetorical articles on anti-fascism characteristic of other anarchist mags, I must take issue with the argument that the ANL are targetted simply because "they don't know how to take care of themselves". I do recognise that the ANL is an SWP front and that it is less directed towards combatting fascism than towards Leninist Party-building, but I'm afraid that this sounds far too much like a 'blaming the victim' scenario and couldn't almost be read as an incentive to further fascist assaults. The Bloody Sunday debacle shows that fascism cannot always be defeated through physical force on the streets alone, as happened at Waterloo, and the fact that the Nazis can and do mobilise in such large numbers at such short notice does mean that unless the anti-fascist movement organises on such an equally mass level reliance on the police for 'protection' will not be unknown. An insensitive and street-fighting attitude can only alienate anti-fascist groups from natural areas of support and from potential allies, however annoying and uncomfortable we may feel at times towards them.

That said, the last issue was great - the cover drawn by Graham Burnett was probably one of the best I've seen!

Steve, Sheffield.

BOOKS

NO MASTER HIGH OR LOW BY
JOHN SHOTTON. LIB ED.

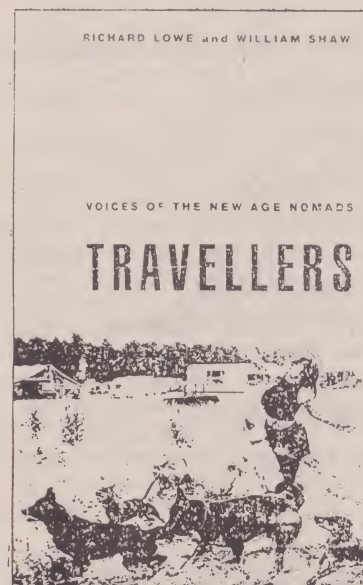

"No master high or low" - the title of a poem by the 19th-century anarchist/socialist William Morris.

This piece of intelligent research effectively rubbishes academia's version of schooling history. A clear distinction between Libertarian (anarchist), and 'Progressive' schooling, the latter under which the two are normally lumped together, is drawn.

The bourgeois tendency of Progressive educators such as Montessori is exposed. The conspiracy to deliberately omit working class traditions of Libertarian education from current textbooks on schooling history by publishers is a point not lost on the author either.

One staggeringly funny thing I learned from reading this book was how the International School 1890, the first anarchist school in UK and the inspiration for the development of libertarian schools in this country, "was opened on the advice of a M. Coulon, an agent provocateur who had hit on

travellers: "Kids who never ever been out of a city, who just got

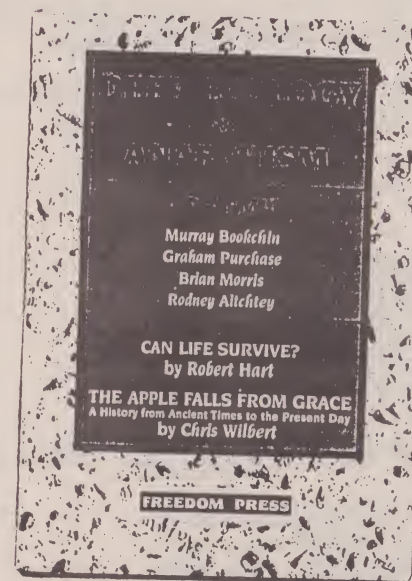

on a bus or started hitching and never ever gone back to Tottenham or Brixton or wherever they came from and just found a new lease of life." (Shannon).

How society is collapsing: "the whole system is in pieces. People in houses can't see it." (Zed)

Troubles with police: "I had a jerrycan full of petrol and a zippo lighter. I went up to them and said 'Fuck off. What do you want?

of people who don't give a shit about society, about washing machines, about three piece suits, mortgages and flash cars".

It doesn't show travellers as saints, but it's not out to demonize them. This is a book to buy, read and pass on to folks hostile to travellers. It will open their eyes....

DEEP ECOLOGY AND ANARCHISM
- A POLEMIC. FREEDOM PRESS,
80pps, £2.50.

This is a serious and wordy book, which grew out of Raven 17 - 'On Land'. Deep Ecology is a look at green philosophy in debate form. Rodney Aitchey reviews the course of ecological thought from Rachel Carson to Arne Naess. Graham Purchase writes (critically) about Murray Bookchin, while Brian Morris is better on George Bradford and the Foreman/ Bookchin debate, but is more hostile towards Naess. Bookchin then responds to the others, mostly

The central premiss of the book - that the royals are rehoused in a midlands council estate, is stripped of any subversive content it might perhaps have had by the fact that we know from page 14 onwards that the story is only the Queen's election night nightmare. The supposed overturning is not for real, the social order of things is never really questioned. In Hell Close, the queen is still the queen, despite all their setbacks the other royals retain their positions of superiority. Even Charlie is still Charlie, despite being fitted up and imprisoned for attacking a copper. The royals' working class neighbours are stereotypes, patronizingly portrayed as criminals and oiks. The residents of Hell Close are ever ready with their cups of tea, stolen melamine and Dunkirk spirit to help the royals through each crisis. Instead of real concern for the ravaged Flowers estate, we have cliché.

This book ostensibly seeks to draw the ends of the social divide together, and it uses that divide as a vehicle for comedy. What would happen if royalty were to really see how the other 99% lives? It asks, but in leaving things intact it ultimately fails to condemn the Tory ravaged wasteland. It mocks the collapse of society, but does not curse. It does not blame those responsible, it goes to the edge, but does not plunge over it. This is why it fails.

Every claim is backed up with evidence - all the usual things you would expect from a scholarly study of history. The academic style of the book is brightened by excursions into personal testimonies - the latest fashion craze for presenting history in bite-sized form. An air of innocence in children's own accounts delivers a knock-out sideswipe at the media and their use of 'sound bites' to obfuscate the libertarian ideals behind 1970s free schools.

THE LAST OF THE HIPPIES. 50p + SAE FROM DS4A c/o BOX 8, 82 COLSTON STREET, BRISTOL.

This booklet may sound familiar to Crass fans as it's the story about Wally Hope from the booklet that came with the Christ double LP.

The story starts in the 1960s and the student revolts of that decade, uprisings at Kent State, Paris and the Provos in Holland, and the start of the festie scene in UK, with free festivals like Windsor Park being suppressed even then. Wally Hope was active on the scene, especially the Stonehenge event, and this involvement led him into conflict with the powers that be threatened by such events. So they had him in 1975, put him in a psychiatric hospital where he was eventually destroyed and turned into a shell, resulting in his suicide.

'TRAVELLERS - VOICES OF THE NEW AGE' BY RICHARD LOWE & WILLIAM SHAW. FOURTH ESTATE, £8.99.

A brilliant sociological study of travellers consisting of 30 interviews with them. They talk about their lives, experiences, outlook, problems with authority. One of the six sections is about the Beanfield and what came after. There is a graphic description of Yellow Wednesday at Twyford. THE QUEEN AND I BY SUE TOWNSEND. METHUEN, £9.99.

GREEN MONARCHIST. 60p FROM 20 UPPER BARR, COWLEY, OXFORD.

Richard Hunt's latest publishing venture takes his views about 'peck order' to their logical conclusion, and he's now all out for monarchy. "Cry God for Harry, England and St George" is not

dictionary, and asked to compare the definition of 'black' and 'white'. He is told "The truth's in there, but you gotta read between the lines".

Sadly, the second half of the film doesn't live up to the excellence of the first. The main reason for this is that instead of concentrating on Malcolm X as a political activist, it attempts to turn him into a politically correct religious leader. Much of the second half concentrates on his pilgrimage to Mecca, and so side steps the context of the racist American state in which Malcolm X flourished. Another aspect of this problem in the second half is the narrative confusion between X's growing conflict with Elijah Mohammed, and the FBI who are bugging him/following him. The structural interference between the two plot lines becomes so great that in the end (and this is probably intentional) we are left confused as to who exactly pulled the trigger.

This PC-ness eventually collapses in its own incoherence at the very end, when Mandela/Mohammed is seen as a school teacher giving a sermon about what X stood for.

The second half has its moments though. The earlier sequence of flashing white faces where Malcolm comes to believe that all white people are evil is resolved in his reconciliation to all races during his Mecca pilgrimage. One important step in this rejection of racism happens on the university steps, when a patronising, but well meaning white student asks what she should do to help liberate Black people, to which Malcolm replies "Nothing".

Two other sequences in the second half which are good are the interview after the assassination of Kennedy, which he calls "Chickens coming home to roost" and the TV studio sequence about

Tavner deportation, direct action
at AWE Burghfield and Alder-

It's the news sheet who called GA
"A bunch of pipe welding, brick

counter-culture don't need us.
Apart from this, it's got a
worthwhile listing of London gigs

good direct action calendar and
even green news. It's good to see
this lot back after a quiet time
and they're well worth supporting,

GREEN MONARCHIST. 60p FROM

OXFORD.

Richard Hunt's latest publishing
venture takes his views about
'peck order' to their logical con-
clusion, and he's now all out for
monarchy. "Cry God for Harry,
England and St George" is not
restricted by personal consistency,
neither does he show signs of
learning anything from the excess-
es of tabloid Royalty worship. Far
from it. The only thing that
remains obscure now is which
monarch? Does Green Monarchist
support Queen Elizabeth or King
Richard?

FILM

'MALCOLM X' BY SPIKE LEE.

We had to wait six months for
this. Was it worth waiting? YES
but we have some reservations
about the Malcolm X industry and
the spectacularisation of X as a
cult figure.

Most of the first half of the
film is spent building up to the
moment where small time hustler,
'Detroit Red' becomes 'Malcolm
X' a convert to the Nation of
Islam and a believer in the "Pro-
phet" Elijah Mohammed.

conflict with Elijah Mohammed,
and the FBI who are bugging him/
following him. The structural
interference between the two plot
lines becomes so great that in the
end (and this is probably inten-
tional) we are left confused as to
who exactly pulled the trigger.

This PC-ness eventually coll-
apses in its own incoherence at
the very end, when Mandela/
Mohammed is seen as a school
teacher giving a sermon about
what X stood for.

The second half has its mom-
ents though. The earlier sequence
of flashing white faces where
Malcolm comes to believe that all
white people are evil is resolved
in his reconciliation to all races
during his Mecca pilgrimage. One
important step in this rejection of
racism happens on the university
steps, when a patronising, but well
meaning white student asks what
she should do to help liberate
Black people, to which Malcolm
replies "Nothing".

Two other sequences in the
second half which are good are
the interview after the assassinat-
ion of Kennedy, which he calls
"Chickens coming home to roost"
and the TV studio sequence about
the field negro and the house
nigger.

Lastly, the magisterial build-up
of tension in the Brother Johnson
sequence where the Nation of
Islam surround a police station
after one of their speakers is
beaten up and arrested has to be
mentioned. The moment where Mal-
colm X confronts the police is
almost certainly the best moment
of the film. Even then, his human-
ity shines through in the triumph-
ant smirk he flashes at the police
chief before ordering his followers
to disperse.

All in all then, this film per-
haps would have been better if it
had been shorter and hadn't pulled
its punches over his politics. Even
so, it's well worth seeing....

atmosphere of the 1940's is evocat-

bouyantly supported by the backing

set against Malcolm's denial of his

What can I say? If you want
something with edge and power,
can't stand the teeny indie kids
who now love Back To The Planet
for the next six months until
something else comes along, then

this is a ska band for you. With two covers, one a Wallers song from 1962 which they play better than the original (sorry Bob but it's true) and the other a Minor Threat song in a hardcore medley of three song, with a live bit with that doing a song off one of that albums and various other groovy tracks. But what's a bosstone?

MIGHTY MIGHTY BOSSTONES - DON'T KNOW HOW TO PARTY.

For all of us lucky enough to hear the Bosstones first two LPs, this is a bit of a disappointment. The guitars are too high and metally, the brass section too quiet and more like the James Taylor Quartette or Fishbone than their usual groovy Ska sound which could put the old Beggars set up, before the old sax player got arrested at the Cocksparrow gig and went home to Germany and got a job. On the plus side, this record does have its ups, like the storming Someday I Suppose off their recent 12" which lifts this LP above the average. A band well worth checking out live, for sure.

SEXLESS PISTOLS - DENY. £7 FROM MANDALA, PO BOX 344, LONDON SE19 1EQ.

As you can guess from the name of the band, they sound like the Sex Pistols but what makes this lots different from all the others is their good anarcho lyrics by Steerpike. I've heard people pay £25 for this thinking it's a lost Sex Pistols LP, so if you like them check this out.

AIR-RIFLES INTO DIESEL FIRE-ARMS!

With very little effort and almost no cost you can double the power of your air-rifle without adding washers behind the cocking spring. If you go to the trouble of using washers to increase spring pressure, then additional diesel power will give you the weapon mother-fucking edge if you fancy yourself as an assassin.

Diesel engines work by rapidly compressing air in the cylinder. If air is compressed fast enough it will reach temperatures exceeding 600 degrees C - well hot enough to ignite diesel oil when it is injected into the cylinder. Simply apply this principle to your air-rifle; you can even be green about it, using bio-diesel fuel (vegetable cooking oil) instead of mineral diesel oil. I have experimented and found that the best results were achieved by using cotton wool dipped in chip oil plugged into the back of ordinary lead pellets. Don't use too much cotton wool - just enough to half fill the pellet skirt.

Fire a few normal pellets into a block of wood, then try an oiled pellet. It should penetrate the block to twice the depth of ordinary pellets. Now blow down the barrel and if light blue smoke puffs out, you used the optimum amount of oil to suit the spring air pressure. Dark smoke means either too much oil or not enough spring pressure.

AOS/3 - GODS SECRET AGENT LP. £5 FROM AOS/3 c/o SCOERC, 44 MOWBRAY ROAD, HENDON, SUNDERLAND

A classic first bit of vinyl from this lively, bouncy punk/ska band, muchly taken from their 'apparent-ly we had a great time' studio and live tape, all this time lovingly recreated in the studio. This LP is living proof that situationism is alive and well and living in Sunderland. Well worth a listen.

BACK TO THE PLANET - DAY-DREAMING EP.

A more poppy EP from BTTP, but that goes with the territory we guess. We still like their personal brand of dancable ska but Phil does sound like Kate Bush. The two unreleased tracks are really cool as, if you've ever seen BTTP in the last 2½ years, you must know Daydreaming, with Talkin' Time being a powerful, more disco tune blast at modern life and with Breathin' Roots a full-on ska stormer, Hammond-sounding organ and all.

To add our tuppence to the sell out debate, BTTP were never a revolutionary band and by signing to a major label have sold none of their own values out, just those of some of their fans who wrongly stuck their own views onto the band and who felt betrayed when the band moved on.

BTTP have a debut LP out in September for those of us still interested.

Bustling poppy punk not too unlike the House Martins with one song sung as if by Elvis Costello. This is the first single from this hard-working band and it hasn't let them down. On to greater things? Who knows?

COURSE OF THE ELFIN

"It's been found to the cost of the technocrats that computer systems can be 'crashed' by exposing them to microwave radiation just like that found in normal microwave ovens! This accidental discovery means it's simple for any member of the public to cause malicious computers to crash - from a safe distance! No break-in, no hacking required.

Sadly the units that make the microwaves in ovens spread the beams out to cover a wide area so they are dangerous to the operator and have a very short range. SAT-ELLITE TV to the rescue. The dish aerials are perfectly designed to focus an incoming beam of energy to a point - they also work in reverse to create a narrow straight beam from a source like a microwave.

So the idea was born to replace the TV receiver unit with a micro-wave transmitter of low power. Low power is all that's needed to crash a computer or jam a walkie-talkie and it has the advantage of a smaller power supply. One watt is low power.

If you want to experiment with full power 650 watt oven power then you'd better be damn careful not to get burned.

These powers can cook! Mounting the microwave unit on the satellite dish needs great care to put it at exactly the focus point for that dish. (Consult experienced engineering folk).

Make sure the microwave beams are directed towards the centre of the dish, so they don't spill over around the edges. It's best to avoid exposure to even low powers of microwave energy (fix guard).

Dishes have various mounting brackets on them to provide handles for the operator. It is useful to fix sights if you want a chance of hitting the target quickly, although slow sweeps can be used to take out a whole area.

A trigger-like switch is highly recommended so there is a fail-

safe (ie. if you let go of the switch, then the power cuts off). Also it seems to be the onset of the beams does the most damage, so pulsing the trigger will be more effective than leaving it held down.

Perhaps someone out there will invent a pulsing buzzer switch which might increase effectiveness, but so far it's a silent unit ideal for concealed use.

This unit crashes computers by screwing up the data in its memory. It doesn't damage the computer physically at all, so they can just switch it off for a while and use it again later. The most effective times to use it are when information such as accounts is being printed out or when data is being typed in.

Information on discs is not affected by the microwaves, but a strong magnet 'wiped' across the top of boxes of discs will invisibly delete the information on them permanently.

RANGE AND ACCURACY

This depends mainly on how narrow the beam of M-waves is. A badly set up dish will disperse the energy so it diverges quickly but a properly aligned system makes a beam like a laser that may carry energy for quarter to half a mile.

Try removing the glass from a van window, replacing it with cardboard. Then slowly drive past the target building with a passenger activating the beamer as needed.

Invisible hit, easy getaway! Can be confirmed with binoculars if you can watch the computer operators suddenly start to panic.

POWER SUPPLY

Well, you can use mains electricity if you keep the original microwave oven electronics. Disadvantages are Too High Power Output and long mains cables. Not portable.

If 12 volt ovens are available from your local caravan shop then it's easy to provide a car battery to power the thing.

THE EDITORIAL

When you turn to the editorial, you usually expect pompous spouting about how the revolution is imminent or how much better the editor's group is than all the others. We don't suppose you'll mind if GA doesn't do its editorials that way - not this issue anyway, not when you can read all our news and views in the rest of the paper.

No, we prefer to explain the practical stuff - you'll see that the questionnaire promised in GA32 is in this issue [p.13] although remember that with the little boxes, the one nearest the text is 'strongly approve' and the one furthest from it is the opposite!

More importantly, you'll see that we've decentralised contacts and editing of the paper. This is to make it cheaper to get UABs circulated nationally and to speed up production time of the mag. It's only the first phase of our decentralisation - if this works out, a couple of issues down the line, we should be going a lot further. To handle this phase, check the relevant boxes!

You'll also notice that our price is up - up and down like a yo-yo these last few issues, eh? - but then so's the number of pages proportionately because of all the excellent copy you sent in, so you can't complain, can you?

NEXT ISSUE

GA34 will be on class. Is class part of the lingering legacy of bankrupt Marxism which we must abandon, or does it still have some use? Should it be so important in our analysis? How does class relate (if at all) to the theory of core and periphery? Make your contribution to this vital debate....

THE SMALL PRINT

ARTICLES

If you're got any opinions you
 want to share, send 'em in to GA
 via Oxford Green Anarchists, Box
 ZZ, 111 Magdalen Road. We'll
 eventually print anything that's
 interesting, readable and under 600
 long on a no censorship, no
 endorsement basis. If you read an
 article you don't like, think out
 why and send in your response. GA
 isn't published on Planet Trotsky -
 anarchy is about thinking for
 yourself.

SUBS & STREETSALLES

If you want to streetsell or
 subscribe to GA, send the form
 and postal orders - we hate
 cheques! - off to Oxford Green
 Anarchists, Box ZZ, 111 Magdalen
 Road. Don't forget to add 30% to
 cover our postage costs if you're
 living overseas.

If you're a prisoner or living in
 the former Eastern Bloc, we'll
 send you a free GA each time you
 write for one.

MAIL ORDER

To order from GA, fill in the
 form opposite and state how many
 of each item you want next to it.
 Then send it off to Alder Valley
 Anarchists c/o 151b London Road,
 Camberley, Surrey GU15 3JY with
 postal orders or cash - not
 cheques - to cover the cost of

substitute items of equal value if
 what you ask for is out of stock.
 Remind us if we don't meet your
 order after six weeks.

ADVERTISING

Send camera-ready ads to GA via
 Oxford Green Anarchists, Box ZZ,
 111 Magdalen Road. We charge £60
 for a full page, with smaller ads
 pro rata. We can be persuaded to
 swap ads with other zines. Small
 ads cost 6p a word.

SECURITY

If you want to get in touch with
 us green anarchists, remember that
 the State thinks we're subversives
 and regularly monitors our mail.

You are responsible for your own security!

When writing to us, use a false
 name or your forename only, and
 a PO box or c/o address if you
 want a reply. Payment by postal
 order or cash is safer than by
 poxy cheques. This is not a free
 country, so be warned - careles-
 sness over security can get you
 blacklisted or worse!

DISCLAIMER

This magazine and all items sold
 through GA Mail Order are prod-
 uced for entertainment purposes
 only. No material in it is intended
 to incite any action liable to lead

You'll also notice that our price is up - up and down like a yo-yo
 these last few issues, eh? - but then so's the number of pages proportion-
 ately because of all the excellent copy you sent in, so you can't complain,
 can you?

NEXT ISSUE

GA34 will be on class. Is class part of the lingering legacy of bankrupt
 Marxism which we must abandon, or does it still have some use? Should it
 be so important in our analysis? How does class relate (if at all) to the
 theory of core and periphery? Make your contribution to this vital debate....

DEADLINE: 17th JANUARY 1994

THE OUTLETS

We've listed our outlets to do them, you and ourselves a favour - and don't
 forget that if you're starting up a new zine of your own, all these people are
 worth approaching.

Remember that you need to buy from shops *in person* but mail order by post
 from distribution outfits - and that you are *guaranteed* to get GA if you
 subscribe....

THIS IS GREEN ANARCHISM

CIVILIZATION IS EXPLOITATION

Mass society is too complex to work without specialisation. Specialised division of labour alienates us from each other and creates a hierarchy needed to co-ordinate production. Hierarchy divides society into the powerful and powerless. The powerless are treated as objects to be exploited. Exploitation on grounds of class, gender, ethnicity and sexual preference is intrinsic to mass society. Mass society cannot be reformed. It must be replaced.

SMALL IS BEAUTIFUL

Mass society must be replaced with communities small enough for

each person in them to be respected as an autonomous individual. In small communities, self-determination would replace hierarchy. You can't fight mass with mass. If our means and ends are to be consistent, we must organise in networks of autonomous small groups to replace mass society.

LAND OR DEATH

Mass society alienates people from the Earth. By controlling the Earth's resources, the State controls society. We must end our dependence on the State by taking back the land and living self-sufficiently. By re-establishing our relationship with the Earth, we

undermine the hierarchical thinking that is destroying it.

REVOLUTION ON THE PERIPHERY

Mass society needs resources from across the planet to survive. Those most exploited by it are those that work the land in the Third World, only to have the fruits of their labour exported to profit the rich. They have nothing to lose by taking back the land at the expense of mass society. As less resources are imported from the Third World, mass society won't be able to come up with the goods in this country. Self-governing, self-sufficient small communities will be more needed and easier to

establish as the State loses control of the rest of the planet.

AUTONOMY NOW

We must support the revolution on the periphery by making our own here. We must share the skills needed to survive without the State, create a culture of resistance to free us from the alienation of mass society, live free of exploitation by boycotting banks and multinationals, building an alternative green and black economy and defending ourselves and the Earth by taking direct action against military bases and labs, developers and industry, exploitation and intolerance.

THIS SYSTEM IS INSANE

LAST APRIL 19th, the world watched mass murder over their TV dinners. That day the FBI ended their two month long siege of Ranch Apocalypse near Waco, Texas, by burning 70-100 people to death for arming against the State.

David 'The Messiah' Koresh may have been a total dingbat but the Branch Davidians were never a suicide cult. That was just the FBI's excuse to massacre them. Throughout the siege they tried to tell the media this by writing messages on bedsheets, the only communication the FBI would allow between them and the outside world.

Far-fetched? It's just the same as what the FBI did to radical Black greens, MOVE, on 13th May 1985. Instead of tanks, they used a helicopter to drop a thermite bomb onto the roof of the Phila-

delphia commune MOVE holed up in. It - and 60 other neighbouring houses - were burned as a result. Six adults and five kids died back then but amazingly two activists survived - Ramona Africa and a 13 year old boy, Birdie. As at Waco, the FBI claimed afterwards that MOVE were suicidal fanatics.

Now imprisoned for the 'crime' of self-defence, Ramona was told about Waco by the press. She toldn them: "It's May 13th all over again ... I hope it is an example for people ... to stop hallucinating about the system they're dealing with and realize that this system is insane".

A full briefing on MOVE is available for 20p + SASE from:

Green Revolution, PO Box 845, Bristol BS99 4QE.

CHRIS COLE WALKS

BRITISH AEROSPACE Ploughshare Chris Cole walked from St Albans Crown Court on 19th October despite causing £90,000 damage to Hawk jets at BAe's Stevenage works [See GA32].

Three of the jury thought his action was justified as the Hawks would have been sold to the Indonesian government - the judge, Justice Sedley, pointed out that they'd have been used for genocide in East Timor, genocide being a crime in UK law.

Unfortunately we haven't got a license to trash the War Machine yet - Chris is to be retried.

SHOW SOLIDARITY: BAe Ploughshares c/o NVRN, 162 Holloway Road, London N7.

COULPORT BLOCKADE

16 WOMEN AND 22 MEN were arrested for blockading the Royal Navy's nuke sub base at Faslane on 18th September. One, peace camper Fiona, returned repeatedly to the road to blockade the North Gate despite being nine months pregnant.

FOR MORE INFORMATION on future blockades and nukewatching:

Faslane Peace Camp, Shandon, Helensburgh, Dumbartonshire, Scotland G84 8NT.

CHELTENHAM CHAOS

A COP CAR WAS stripped, sloganised and had two tyres slashed in protest against Operation Gemini, intensive surveillance in the Gloucestershire area.

For good measure, McDonalds, BK, Boots and two butchers found themselves on the receiving end of stink bombs and catapults.
